TAMPER EVIDENT MATERIALS

FEATURES

- Clear evidence of tampering by freezing, heating or peeling
- Displays the void message from -90°C to +90°C on the Standard Void product
- Option to include irreversible thermochromic inks, positioned between the film and adhesive
- Adhesives specifically designed for the security industry
- Clear void graphics
- Face material options 36 or 50 micron PET / Corona Treated
- Liner options 36 micron PET, 64 micron SCK
- Colour options: orange, blue, red, purple, dark green, green, white, transparent
- Suitable for indirect packaging in food and pharmaceutical industries (FDA documents could be provided)
- Barcode scanners can scan through the label
- Colour and void message can be customized
- Any printing methods such as flexographic, thermal printing, inkjet etc. can be used

STANDARD VOID

- Once voided the material leaves behind a tacky void residue on the substrate to which it was applied.
- This type of material was originally designed for LDPE bags (cash in transit, courier bags, police evidence bags, STEBs bags at the airport etc.) but will work on the other surfaces listed below.

Standard Void material particularly suited for applications for following substrates:

- coated paperboard
- plastics
- glass

Above commonly used in following markets:

- food packaging/delivery (except for corrugated or uncoated paper board)
- pharmaceutical packaging
- high value electronics packaging
- brand protection,
- jewellery protection
- airline industry (except for securing aircraft doors)

DRY PEEL VOID

- When voided the Dry Peel material leaves behind a non-stick coating with the void residue. The label will not be able to be reapplied.

Dry Peel material particularly suited for application for following substrates:

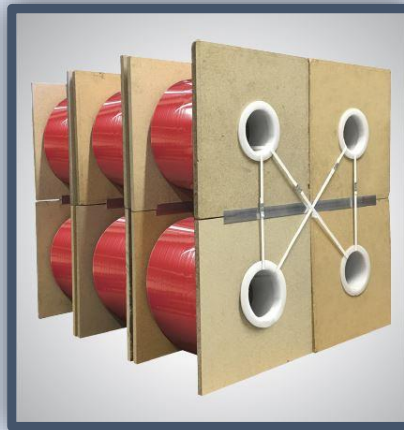

- **corrugated and uncoated substrates**
- **corrugated boxes and paper packaging**
- **coated paperboard**
- **plastics**
- **glass**

Above used in the same markets as Standard Void

Standard jumbo dimensions:

Width (total)	330mm
Width (coated)	320mm
Length	3125m
Square meters	1000m ²

Slitting to customer required size is available
